Project

Stock predication Bots

It will gather stock data from various free API providers and apply technical indicators to predict stock prices, simulating paper money to evaluate real-time practical predictions.

Fast Memorizing Tools

It is a web application designed for practicing competitive materials, utilizing psychological concepts to enhance memory retention. It also collects user performance data, which I use to fine-tune my model.

Project Plastic

It is an innovative research project focused on plastic biodegradation, with an exploration of the biopolymer industry to pave the way for starting a new business.

Intense, Integrated & Sustainable Farming System

It is developed from my two years of agricultural studies and five years of farm experience, aimed at exploring new technologies in farming and increasing income per unit area.

Education

Acharya N.G. Ranga University (Pursuing)

Bachelor of Science in (Hons) Agriculture
2022 -

+2 Govt. Jr. College, Rangampeta

Bi.P.C stream 2020 -2022 (**83.6 %**)
